## Offshore Operation Manager, Sénior

---

### EXPERIENCES PROFESSIONNELLES

---

juil. 2019 / aujourd'hui

#### Offshore Operation Manager in Telecommunication industry

Alcatel Submarine Networks Marine (NOKIA filial)

Manager and coordinator of several Fiber Optical Cable projects, several vessels and several management teams in the same time:

- managing technical installation aspects (including UneXplosed Ordnance -UXO- topic), organizing vessel bunkering philosophy to minimise costs according to endurance calculation,
- in charge of all operational permits and notifications to allow vessels to lay cable inside Exclusive Economic Zone (EEZ) and Territorial Waters (TS),
- exchanging with local agents to plan operations according to local and administrative regulations, coordinating logistics, customs, vessel Temporary Importation, vessel clearance in and out, vessel safety and security,
- update of Plan Of Work (POW) according to vessel progress, unpredictable events, new priorities, risks and opportunities,
- planning crew change according to countries legislation and COVID protocols,
- in direct relation with vessel master, superintendent, project manager and offshore Representative,
- planning mobilisation and demobilisation of vessel, including cable spooling from factory or freighters.
- paying local agents and suppliers via Purchase Request and Purchase Order in advance and following invoices (FDA) via SAP interface (FIORI).
- checking vessel weather or mechanical stand by, potential claim to third party companies in BIMCO contracts.

sept. 2005 / juil. 2019

#### Senior Method Engineer (installation, mobilization and operation) in Oil and gaz industry

For different Oil and Gas Company: Saipem, Technip and Subsea 7 (previously Acergy and Stolt Offshore)

Several different scope of works performed, for different client (ENI, Total, Exxon, Chevron) in different country ( Egypt, Angola, Congo, Nigeria) as:

- flexible jumpers installation from reel, umbilicals transpooling and installation from reel and carousel,

- deepsea structure liftings & installations: Suction Piles, Module, Manifolds, Wet Parking Frames, mudmats, crossings, sleepers. Coordinator of internal interface with Technip India (15 engineers) performing installation procedures, drafting & installation analysis. Responsible of installation documents issued by Technip India (5 engineers),

- tenders: issuing Installation Method Statement, Time Estimate, Equipment Databook and Transportation Plan for structures, - hook-up lifts of 100mT Deck Extensions (3 layers decks) including site survey,

- deepwater offloading system: Oil offLoading Line (OLL), Floating Hoses, Mooring Hawsers, Spools Installation.

In charge of interface, rigging requisitions, rigging design report, risk assessment (HIRA) report, transpooling procedure, installation procedure, tie-in procedure, installation aids & equipment databook.

Several onshore and offshore campaigns performed on different yards and different vessels (including tasks plans, check lists, task completion certificate, CPY Rep & MWS meeting).

### DIPLOMES ET FORMATIONS

---

sept. 2002 / sept. 2005

#### Master degree in Offshore engineering - BAC+5

at Superior School of Engineers of Marseille ESIM (now Centrale Marseille) - FRANCE

**sept. 1999 / juin 2002**

**Preparatory Classes to Top Engineering Schools**

Brest, FRANCE
